

The terms are settled. Only the numbers move.

These are the same terms we have put in front of everyone who has asked. Nothing here is a negotiating position — it is the shape of the arrangement, so you can decide whether it suits you before anybody talks about price.

Our own machine, trading since June 2026.

SIDE BY SIDE

The same three routes, compared

	LEASE	BUY	SOFTWARE ONLY
How long you are committed	12 months minimum, then three months' written notice whenever you want out	Not at all — it is your machine from the day you pay for it	Month to month. Stop when you like
Getting it live	One fixed charge of £900, the same either way: site survey, delivery and positioning, the card facility, lane layout, the catalogue built from your own invoices, installation, first fill and training		Nothing to install. We help get your history in
Ending up owning it	Three quarters of every rental comes off the price, so you can buy it outright whenever you like — the longer you wait, the smaller the balance	Yours from day one	Not applicable
If it does not work out	After the 12 months: three months' notice, a £300 collection charge, and nothing else. You keep everything the machine took	Sell it — it is an asset you own	Cancel. Your data exports with you

	LEASE	BUY	SOFTWARE ONLY
Support	Care plan free for the first 12 months including one site visit a year, then £360 a year if you renew. Monitoring, remote diagnosis, price and product changes, recognition training, warranty claims handled with the factory		Support by email and WhatsApp, included
The back office	Maimava is free for six months, then 1% of what the machines take with a £5 monthly minimum. Optional throughout — the fridge works without it, and you can stop paying for it without giving the machine back		
Signing personally	If you trade through a limited company, a director's guarantee — capped at the rentals to the end of the minimum period plus the collection charge, and nothing beyond	Nothing	Nothing

WHATEVER THE ROUTE

Four things that are always true

- **The stock and the takings are yours.** You choose the range, you set the prices, and every penny the machine takes is yours. We put none of our own stock in it and take no share of your sales.
- **The merchant account is yours.** Takings settle directly to you. We never hold or handle your money at any point.
- **Your data leaves with you.** If you stop using the back office, it exports.
- **Every figure we quote excludes VAT,** charged at the rate in force. If you are registered you reclaim it; if you are not, say so and we will redo the sums showing what you would actually pay.

WHAT THIS DOCUMENT IS

This is a summary of terms, not a contract. It is here so that the shape of the arrangement is clear before anyone spends time on a quotation. A machine goes in against a written quotation and our Equipment Supply and Hire Agreement, and you get both in full, to read, before you commit to anything.

Where this summary and the signed agreement differ, the agreement is what binds. Nothing in this document is an offer capable of acceptance, and everything in it is subject to a site survey, availability and lead time.
